About TIMS project

TIMS project presents itself as a possible answer to successively manage labour market transitions (unemployment, digitalization, economic uncertainties – COVID19), by designing an innovative, digital and open access VET programme – suitable for distance learning - that will approach the work between VET providers and businesses (SMEs), along the project cycle and beyond.

TIMS course is “a flexible and learner-centred VET programme” with a practical “**Handbook for Innovation Agents**” and “**TIMS Self-Assessment Tool for Innovation**” will provide a holistic view for leadership and innovation by comprising managerial, interpersonal and reflective skills which will then be applied into building innovative modus operandi in European SMEs; based on the ISO 56000 series standards for Innovation Management.

TIMS project aims to:

- Assist the organizations in need to **scale up the existing quality management system to innovation management system** for launching the competitive strategy
- **Promote innovation in European SMEs and Nigerian SMEs** as the main tool to facilitate sustainability, learning throughout life, and adjusting to the changes
- **Promote transnational networking** and exchange between enterprises and VET providers at the European level, applying theory to the European business scene

TIMS target groups and main stakeholders will be:

- *VET and Adult Education providers*
- *SMEs*
- *associated partners*

Project results

1.

a **Tailored Sell-Assessment Tool for Innovation Management (IM)**, dedicated to **ISO 56000 series**;

2.

a **Competence Matrix** based on **Innovation Management ISO series**, using the EQF approach and a **EU micro-credentials** approach;

3.

a **Training in Innovation Management System - TIMS COURSE** - a set of innovative learning-centred materials and methodologies, adapted to f2f and online modalities;

4.

a **conceptual Handbook for "Innovation Managers"** with:

- *State Analysis Assessment regarding the ability of companies to adapt Innovation Processes;*
- *inspirational case studies and "to-be solved- case-studies";*
- *Risk and Change theories (ISO 31000);*
- *a collection of existent Innovation Assessment tools;*
- *an "Innovation Strategy" to help "Innovation Agents" in SMEs & micro-enterprises.*
